PROJECTS

1.**Project Title**:<u>Hotel Management System(Frontend)</u>

Tech Stack: HTML, CSS, JavaScript.

Description: Developed a responsive hotel management system interface that allows users to book rooms online. Implemented form validation and dynamic feedback using JavaScript. The system includes options for choosing check-in/check-out dates and selecting room types. Styled using CSS for a professional and user-friendly layout.

2. **Project Title**: <u>Chatbot</u>

Tech Stack: Python (Flask), HTML, CSS.

Description: Developed a simple rule-based chatbot application with a graphical user interface using Python's Tkinter library. The chatbot interacts with users by interpreting basic inputs and providing predefined responses, including Python code snippets. The application simulates conversational interaction and demonstrates basic natural language processing logic using dictionary-based matching.
